

JUSTRITE MANUFACTURING CO.

CHICAGO, ILL.

Manufacturers of

Justrite Carbide Mine Lamps

for

Miners, Superintendents, Engineers, Drivers, Pit-Bosses, Etc.

The carbide miners' lamp is fast superceding the old smoky oil lamp. About 60 per cent of the coal miners are now using them. They are superior in lighting value, cleanliness and healthfulness and can be operated at less than one-half the cost of Oil. They are also a safer lamp as they give a pure white light equal to 16 C. P., enabling the miner to see the dangerous roofs and preventing many accidents from falling rock, etc.

This company has made many improvements in construction and method of generating and is constantly endeavoring to simplify and make them easy to operate and care for.

No. 85
16 C. P. Weight, 5 Ounces.

Miners' Cap Lamp—Lever Feed With Lighter Attachment

These lamps are drawn from seamless brass;—not soldered together—attached parts are riveted and soldered on inside, making the JUSTRITE the strongest and most durable lamp. Reflector is part of the lamp, cannot get loose or be broken off. The No. 85 type is equipped with a sparker which lights the gas instantly with a rub of the hand. The Lever regulates the water feed, prevents clogging and saves carbide.

This style lamp finished and packed as follows:

No. 85 Polished Brass with No. 77 Carbide Can.....	\$1.00
No. 57 Polished Brass with Extra Bottom	1.00
